

MUKESH K

B.Tech Information Technology | Final Year Student

📞 9940862572 | ✉️ mukeshk25.dev@gmail.com | 📍 Thanjavur, Tamil Nadu | [LinkedIn](#) | [GitHub](#)

CAREER OBJECTIVE

Motivated B.Tech Information Technology final year student with hands-on experience in Python programming, OOP, data structures, and backend development. Passionate about writing clean, efficient code and building real-world applications. Seeking a Software Developer / Software Engineer role to contribute technical skills, problem-solving ability, and a strong learning mindset to a dynamic engineering team.

EDUCATION

B.Tech — Information Technology	2023 – 2027
V.S.B College of Engineering Technical Campus	CGPA: 8.26 / 10
Higher Secondary Certificate (HSC — Class XII)	2023
Brilliant CBSE Senior Secondary School	75.4%
Secondary School Leaving Certificate (SSLC — Class X)	2021
Brilliant CBSE Senior Secondary School	86%

TECHNICAL SKILLS

Languages	Python 3, Java (Basics), MySQL
Core Concepts	OOP, CRUD Operations, Exception Handling, Modular Architecture, File I/O (JSON)
AI / ML	Generative AI (Concepts)
Tools	GitHub (Repository Hosting & Deployment), VS Code
Soft Skills	Communication, Problem Solving, Team Collaboration, Quick Learner

PROJECTS

MailBrain — Smart Email Management System | **Ongoing**

Technologies: Python, FastAPI, SQLAlchemy, Pydantic, SQL, REST APIs, Uvicorn, Git/GitHub

- Developing a smart email management system to organize and manage emails based on importance and user requirements using a modular Python backend.
- Building a RESTful backend API using Python and FastAPI for email, user, and mail-management operations with separate route components.
- Designing a relational database schema using SQLAlchemy ORM to store and manage user and email-related data efficiently with persistent SQL storage.
- Implementing Pydantic schemas for structured request validation and API response handling, ensuring data integrity across all endpoints.
- Developing user management and authentication-related backend components with secure password handling, email categorization, and pending-reply tracking features.
- Following a modular backend architecture with separate components for database connection, models, schemas, routes, and application logic — mirroring real-world production practices.

Library Management System V2 | Python, MySQL, OOP, Git

- Developed a modular, menu-driven Library Management System in Python with MySQL integration, implementing full CRUD operations for book management with persistent relational database storage.
- Designed a layered project architecture separating concerns into configuration, database, model, service, and utility modules — improving code maintainability and scalability.

- Applied OOP principles through a dedicated Book model class, with robust input validation, duplicate ID checks, and search, update, and delete operations.

GitHub: github.com/MukeshK25-dev/Library_Management_System_V2

Student Registration System | Python, OOP, JSON, CLI

- Developed a menu-driven CLI application in Python 3 using OOP — designed a Student class with encapsulated attributes and methods for complete record management.
- Implemented full CRUD operations with duplicate ID validation and multi-level exception handling (ValueError, FileNotFoundError, JSONDecodeError).
- Integrated persistent JSON file storage with automatic load on startup and save after every operation — ensuring zero data loss between sessions.

ACHIEVEMENTS

- TCS CodeVita Season 13 — Secured Global Rank 14136 among lakhs of participants worldwide, awarded by TCS Global Head of Talent Acquisition for showcasing exceptional coding skills.

CERTIFICATIONS & TRAINING

- Python Essentials 1 — Cisco Networking Academy & OpenEDG Python Institute (Jul 2026)
Verify: credly.com/badges/bb4ad8a6-5572-4e30-ad62-f5d9f9e39602
- Python Basics — Infosys Springboard (Jun 2025)
- Generative AI Workshop — CISCO, Pragyan 2025, NIT Trichy (Feb 2025)
- AWS Cloud Computing — Internship Certificate, UpskillEd in association with OneData Software Solutions (Feb–Mar 2024)
